

# Academic rankings

The state of Ohio on Tuesday released revamped school district report cards. School progress is based on four factors.

- 1** The rankings are academic emergency, academic watch, continuous improvement, effective and excellent.
- 2** Category shows how many academic indicators have been met from 0 to 22.
- 3** Districts receive a numerical rating based on how well students score on state tests. Districts receive more points for students who score at the advanced levels.
- 4** A district has made "Adequate Yearly Progress" if a percentage of students from every demographic group passed state tests and showed improvement on graduation and attendance.
